Katherine Dally, Tobil Dynavox Consultants

Full or Half-Day Sessions (You Choose) Limit 20 Participants each session

Morning Workshop (8:30 – 11:00 am):

Low/High Tech Integration & AAC Access

Description

Where do you start when introducing augmentative and alternative communication (AAC)? Most of us start with activities where a student can request a motivating object or action. This session will help you learn how to extend beyond requesting – into the world of asking questions, protesting, and commenting.

This session will help you provide supports and strategies to the emergent communicator. Participants will focus on the stages of pre-intentional and intentional communication as well as how to integrate low and high tech AAC communication supports to allow students to move towards symbolic communication and beyond.

Afternoon Workshop (12:00 – 3:00 pm):

Boardmaker Online

Description

Boardmaker Online allows you to quickly access and implement visual supports for teaching and creating activities. **Please bring:** Laptop, iPad, Tablet, etc.
