

## 300,000 STUDENTS REACHED!

SESA has reached 300,000 students this past month. Since the program first began in 1989, so many of the Allen County students have been impacted by this amazing program! Thanks to the sponsorship, ideas, dedication, and volunteers from Ashland, Fort Amanda Specialties, Linde Gas, Husky Energy, INEOS, Potash Corp, and the Allen County Educational Service Center, SESA has continued to grow and be an influential part to the science curriculum in the Allen County Schools!

In October COSI visited Elida, we sponsored two representatives and hosted the TIE Conference, and also discussed the SESA program with the mayor. Volunteers have been such an excellent addition to many of the presentations too. Joan Neely and Joe Bischoff helped with the Animal Habitat presentation while LD Pierce, Sean Lott, and Tammy Schimoeller presented a Fossil, Rock, and Mineral kit to Allen East. Steve Maki, Jeff Lindeman, Daniel Sawmiller, Jacob Elder, and Dave Kaufman have also ventured out to the schools and have become positive role models to many of the students in Allen County!

Thank you so much for all of the support and I am excited to see the next milestone of the SESA program!
